PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience designing and building scalable backend systems, intuitive user interfaces, and AI-powered platforms. Experienced across frontend, backend, cloud, and data engineering using React, Angular, Vue.js, Python, Node.js, FastAPI, AWS, Azure, Snowflake, and Neo4j.

Passionate about building end-to-end software systems with a strong focus on architecture, performance, and user experience.

TECHNICAL SKILLS

Languages	: Python, JavaScript, Java, C#
Backend	: Node.js, Express.js, FastAPI, Django, Flask, .NET, REST APIs, Microservices
AI & Data	: OpenAI API, Prompt Engineering, Neo4j (Knowledge Graph), Snowflake, ETL Pipelines
Databases	: MySQL, PostgreSQL, MariaDB, MongoDB, Neo4j
Frontend	: React.js, Angular, Vue.js, TypeScript, HTML, CSS/SCSS, Bootstrap, Tailwind CSS
Cloud & DevOps	: AWS (Lambda, Step Functions, S3), Azure (Entra ID, Speech SDK, Blob Storage), Docker, CI/CD, Git
Others	: Linux, Playwright, OOP, Agile (Scrum), Data Structures & Algorithms, System Design

PROFESSIONAL EXPERIENCE

Deloitte USI, Pune, India

Software Engineer 2 | Aug 2025 - Present

- Led the backend development of an enterprise Generative AI platform by architecting scalable services using Python, FastAPI, Neo4j, and OpenAI.
- Designed and implemented React-based frontend components for AI-driven workflows, collaborating closely with product teams to deliver end-to-end features.
- Designed REST APIs and graph-based data models to enable AI-powered knowledge retrieval and intelligent application workflows.
- Designed and optimized scalable Snowflake data solutions using stored procedures, views, tables, and transformation logic supporting enterprise analytics.
- Orchestrated end-to-end enterprise data processing pipelines using AWS Step Functions.
- Designed backend services following microservice architecture principles to improve modularity and maintainability.
- Collaborated with data engineers to integrate Snowflake-based analytics pipelines into AI-driven workflows.
- Worked closely with product managers, designers, QA engineers, and stakeholders throughout the software development lifecycle.
- Participated in architecture discussions, code reviews, sprint planning, and production issue resolution.
- Designed reusable backend components and API contracts to support future feature development.
- Contributed towards improving application scalability, security, maintainability, and overall engineering standards.

Zeus Learning, Mumbai, Maharashtra

Senior Software Engineer | June 2023 - Aug 2025

Software Engineer | June 2021 - June 2023

Software Engineer Intern | Feb 2021 - June 2021

- Led the migration of enterprise databases from MariaDB to MySQL across Azure and AWS while ensuring 0 downtime.
- Developed an organization-wide Playwright automation framework reducing manual testing effort by 90%.
- Conducted technical training sessions enabling engineering teams to adopt automated testing practices.
- Designed and implemented a real-time speech evaluation platform using Azure Speech SDK.
- Built responsive frontend interfaces using Vue.js, React.js and Angular.
- Built cloud-based SaaS applications for workspace booking and enterprise resource management.
- Developed an interactive web-based Learning Management System supporting virtual scientific laboratory simulations.
- Integrated third-party services including Microsoft Outlook, Google Workspace, and ServiceNow using APIs and SDKs.
- Optimized backend APIs, improving application responsiveness and maintainability.
- Conducted 30+ code reviews monthly, improving engineering quality while reducing production defects.
- Collaborated with product owners, designers, QA teams, and developers following Agile Scrum methodology.

Scudo Systems LLP, Ahmedabad, India

Co-founder and Managing Director | Jul 2019 - Jul 2022

- Co-founded Scudo Systems LLP and led the technical development of an IoT-based GPS tracking platform.
- Designed backend architecture for real-time location monitoring using Python and Raspberry Pi.
- Optimized GPS algorithms achieving approximately 10-meter tracking precision.
- Built APIs for device communication and live location synchronization.
- Performed extensive testing, debugging, and performance optimization resulting in 40% faster response time.
- Selected among the Top 5 startups out of over 2,200 participants during Startup India Yatra.
- Raised approximately INR 8.6 Lakhs to commercialize the product.
- Managed engineering, product strategy, client discussions, and overall business operations.

Educative Inc., Remote

Technical Content Writer (Freelancer) | Jul 2021 - June 2022

- Authored nearly 200 technical articles covering JS, React, Node.js, Python, Web APIs, and Software Engineering.
- Created educational technical content for developers ranging from beginner to advanced levels.
- Utilized instructional design principles to improve learning effectiveness through practical examples and interactive explanations.
- The articles can be found at educative.io/profile/view/4908239310815232.

PIblitz, Remote

Backend Developer Intern | Oct 2020 - Dec 2020

- Developed backend features using Django and JavaScript for PIblitz's web platform.
- Implemented multiple platform enhancements using AJAX-based interactions.
- Optimized application performance through backend improvements and code refactoring.
- Implemented session management and cookies to improve user experience.

PROJECTS

Park ME: Your parking partner (Previously: ParkUp) | *Mobile Application*

Technology Stack: Flutter, Firebase, Firestore, RazorPay, Twilio

- Developed a cross-platform parking reservation application using Flutter and Firebase.
- Designed Firestore data models supporting real-time parking availability.
- Integrated Razorpay payment gateway for secure digital payments.
- Implemented Twilio notification services and QR-code based check-in workflow.
- Designed scalable backend architecture supporting reservation synchronization.

Legal WIZ | *Management Information System*

Tech Stack: Python, Django, SQLite, Twilio, JavaScript, HTML, CSS, Bootstrap

- Developed the application during Smart India Hackathon within 36 hours.
- Architected relational database schema and implemented backend services using Django.
- Integrated backend services with a responsive frontend interface.
- Led the development team through task allocation, planning, and execution.

PROFESSIONAL ACCOMPLISHMENTS

- Represented India at **The Professionals International Championship 2023** and won a **Bronze medal** in IT Software Solutions (November 2023).
- Received **Gold medal** for academic excellence (Bachelor of Engineering).
- **Runners up** in Smart India Hackathon 2020 (Software edition).
- Authored nearly **200 technical articles** covering diverse topics, published at educative.io and dev.to.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology
B.E in Information Technology

Jul 2017 - Jul 2021
CGPA: 9.70/10.0

St. Stephens' Higher Secondary School
Higher Secondary Certificate, Science

June 2015 - May 2017
Percentage: 94.53%
